EDUCATION

West Chester University of Pennsylvania

West Chester, PA

B.S. in Computer Science, Honors Seminar Pathway, GPA: 3.76

May 2027

- **Certificates:** Computer Security, Cloud Engineering
- **Relevant Coursework:** Software Security, Intro to Cloud Engineering, Cloud Computing, Artificial Intelligence, Data Structures and Algorithms, Data Communications and Networking, Operating Systems, Computer Security and Ethics, Computer Systems, Differential Equations & Linear Algebra, Discrete Mathematics

EXPERIENCE

Security & AI Engineering Intern

May 2026 – Present

SAP America, Inc.

Newtown Square, PA

- Developed and optimized key frontend features for ASM Suite, including full page designs, navigation, search, and filtering systems to enhance user experience using TypeScript and UI5 Components for React.
- Translated high-fidelity design mockups into reusable, clean code by creating new components and systematically refactoring existing frontend components.
- Authored comprehensive documentation and implemented end-to-end and component testing using Cypress, maintaining testing coverage above 80%.

STAR Newsletter Lead

May 2026 – Present

SAP America, Inc.

Newtown Square, PA

- Led a small team to produce the bi-weekly internal newsletter.
- Produced the quarterly newsletter for stakeholders which included information about summer activities and next rotations.
- Interviewed other STARs about events as well as information about graduation and next steps.

Software Engineering Intern

May 2025 – May 2026

SAP America, Inc.

Newtown Square, PA

- Research large language models (LLMs) and AI tools to identify opportunities for improving workflow efficiency.
- Test and prototype solutions using SAP Build Apps and Business Application Studio.
- Collaborated with another intern and a team member to develop an application using SAP BTP, React, and Flask to increase hiring efficiency.

Lifeguard

Oct. 2023 – May 2025

West Chester University of Pennsylvania

West Chester, PA

- Monitored pool safety for students and faculty, enforcing rules and preventing injuries.
- Collaborated with fellow lifeguards to maintain a safe and welcoming environment.
- Assisted in training and mentoring new lifeguards.

Head Lifeguard

May 2021 – Aug. 2024

Hopwood School and Camp

Towamencin, PA

- Supervised swimming activities for children aged 2–12, ensuring a safe and enjoyable environment.
- Communicated pool rules and safety guidelines to campers and staff using age-appropriate language.
- Coordinated with counselors to plan and execute water-based activities and lessons.
- Led reconstruction of swim lesson structure and supervised lifeguards for ages 6–12.

PROJECTS

Containerized Website <i>Python, JavaScript, NodeJS, Docker, Redis</i>	January 2026-May 2026
• Developed a basic web server using NodeJS that displays the number of visits to the site since launching. • Used Docker to run NodeJS and Redis containers simultaneously under the same Docker Network.	
Album Bot <i>Python, SQLite, Spotipy, Discord, Docker</i>	January 2026
• Developed a Discord bot that serves a randomized daily album and tracks listening progress. • Designed and implemented an SQLite database to manage unlistened and completed album records. • Integrated the Spotify API using Spotipy to fetch and update album metadata in real time. • Utilized Docker to containerize the application for deployment on a hosted service. • Displayed information on Discord for users to interact with.	
GRSH <i>C</i>	October 2025
• Built a simplified UNIX shell in C supporting command parsing and process execution. • Implemented both batch and interactive modes for flexible user input. • Added support for PATH resolution, I/O redirection, parallel command execution, built-in commands, and error handling.	
Care Through The Cosmos <i>Python, Flask, React, JavaScript, HTML/CSS, Git</i>	September 2025
• Collaborated with two other students over 10 hours to create a space-themed survival game. • Used React and CSS animations to simulate star, meteor, and astronaut movement. • Implemented systems for hunger, health, and energy tracking.	
BudgetIT <i>Python, SAP UI5, XML, JavaScript, HTML/CSS, JSON, SAP BTP, Git</i>	August 2025
• Developed a budgeting and coupon-tracking web application during a 3-day team sprint. • Built the frontend with SAP UI5 and hosted it on the SAP BTP platform. • Used SAP Business Application Studio and Git for development and version control.	
Grumblr <i>Python, MySQL, AWS EC2/RDS, JavaScript, HTML/CSS, JSON</i>	April 2022 – June 2022
• Developed a social media-style web app for users to post and like content. • Hosted the site on AWS EC2 and managed user data with an RDS MySQL database.	

SKILLS

Languages: TypeScript, Java, Python, C, JavaScript, HTML/CSS, XML, JSON

Frameworks: React, Flask, UI5 Components for React

Developer Tools: Docker, Cypress, Postgres, SAP UI5, SAP BTP, Google Cloud Platform, IntelliJ IDEA, Visual Studio Code, GitHub, AWS EC2/RDS

Other: Intermediate Academic Fluency in Mandarin Chinese, First Aid Certified, CPR Certified

EXTRACURRICULAR ACTIVITIES

Men's Club Water Polo — President	May 2026–Present
Artificial Intelligence, Machine Learning, and Data Science Club — Secretary	May 2026–Present
Competitive Programming Club — Secretary	May 2025–Present
Men's Club Water Polo — Vice President	May 2025–May 2026
Chinese Club — Secretary	May 2025–Present

EXTRACURRICULAR EVENTS

West Chester Programming Competition	April 2024
PACISE Programming Competition	April 2025
SAP STAR Hackathon	August 2025
OwlHacks 2025	October 2025
CCSC-Eastern Programming Competition	October 2025
Swarthmore Spring Programming Competition	April 2026
